

## StdAtm\_1976

StdAtm\_1976 provides the atmospheric pressure and temperature as a function of elevation.

Ref: U.S. Standard Atmosphere 1976 by [NASA \(NASA-TM-X-74335\)](https://www.digitaldutch.com/atmoscalc/help.htm) using tabular data  
<https://www.digitaldutch.com/atmoscalc/help.htm>

Input: Z - elevation in m (for the SI unit system) or ft for the US unit system.)

Outputs: P - atmospheric pressure in EES pressure units

T - atmosphere temperature in EES temperature units
